

SUBJECT OF PRESENTATION: FATIGUE (with Kyla Zimmermann)

Dr. Marilyn French-St. George is a Human Factors Investigator with the Transportation Safety Board of Canada. She has over 20 years' experience in user requirements specification, cognitive task analysis and risk assessment.

She has worked in the areas of interface design for advanced telecommunications, speech perception and acoustics, as well as adaptive applications for those with physical or sensory disabilities. She has extensive experience in identifying, quantifying and prioritizing user/stakeholder/market/product requirements and has mature product usability skills. Her areas of interest within the TSB are identifying factors that contribute to individual/group decision making and forensic evaluation of audio recordings.

Originally from the UK, Marilyn has lived and worked in the USA and Canada. She has worked in Academia as well as the telecommunications industry and is the holder of 9 patents in the area of multimodal-interface design.

Outside of work, Marilyn is an artist working with her husband in the creation of unique glass art that often incorporates semi-precious stones such as agates and jades.
